

Mission: To provide timely, effective and efficient project delivery and full lifecycle support for infrastructure and environmental assets required for the defence of Canada.

Vision: To be a knowledgeable and innovative leader and employer of choice, valued by the Government of Canada and industry, in the achievement of our mission.

Values: dedication, collaboration, competence, and fairness.

Founded in 1951, DCC is a Crown corporation that provides innovative and cost-effective contracting, construction contract management, infrastructure and environmental services and lifecycle support for Canada's defence and security requirements. It has two primary Client-Partners: the infrastructure and environment group at the Department of National Defence (DND), and the Communications Security Establishment.

Here to serve, working collaboratively with DND

As a result of our long-standing partnership with DND and the Canadian Armed Forces (CAF), DCC has developed a considered, well-managed approach to infrastructure planning that guarantees our Client-Partners' interests and maximizes use of private sector resources. In this regard, DCC is a unique organization. We are singularly focused on the established and emerging needs of our Client-Partners. Separate and distinct, we stand beside DND/CAF in all it does.

Doing business with DCC is easy

After more than 60 years working with DND/CAF, DCC has developed an unmatched understanding of our Client-Partners' needs. As a result, we have streamlined our processes and made the experience of working with DCC as simple as possible.

Here are five reasons why it is easy to work with us.

- **We deliver.** We provide immediate and reliable access to technical and administrative expertise, and do so on a continuing basis at the worksite.
- **We are flexible.** As a Crown corporation and separate employer, we can quickly assign to our projects the number of people required with skill sets tailored to the work.
- **We are focused.** For over 60 years, we have responded with singular attention to the unique and exacting requirements of one main client.
- **We are cost effective.** We offer very competitive pricing for our services, help save our client money on consulting and construction work carried out by the private sector and recover all of our own costs.
- **We understand service.** We know how the construction industry and the government work and can, therefore, mediate effectively any differences that arise between DND and external service-providers.

More than just construction

From project need planning through building decommissioning, our work covers a broad spectrum of activity. DCC's resources are divided among five service lines.

- **Contract Management Services**
The Contract Management team supports the creation, renovation and maintenance of facilities for DND's infrastructure and environmental program.
- **Contract Services**
The Contract Services team carries out the procurement of goods and professional, construction and maintenance services to fulfill Canada's domestic and international defence infrastructure needs.
- **Project and Program Management Services**
The Project and Program Management service line advises DND on matters such as building requirements, program planning, and schedule and document control.
- **Environmental Services**
Environmental Services helps DND meet environmental performance targets, comply with regulatory requirements, and manage due diligence and risk.
- **Real Property Management Services**
From needs planning to facility decommissioning, the Real Property Management Services team ensures DND's real property assets are managed efficiently throughout their lifecycles.

DCC's services cover all the bases

DCC is a Crown corporation whose mandate is to carry out a wide range of procurement, disposal, construction, operation, maintenance and full lifecycle support activities required for the defence and security of Canada, particularly those related to real and personal property, lands and buildings.

DCC employs more than 800 professionals—among them engineers, engineering technicians and technologists, environmental engineers and technologists, experienced tradespeople and other professionals—and maintains offices at all of the Canadian Armed Forces' bases, wings and area-support units.
